

Bearings Tips

1. North is 000°
2. Bearings are written as 3 digit numbers

3. Bearings are measured clockwise from North (000°)

4. Before you make your line:

- Look at the angle measure
- What quadrant (section) is your angle measure between?
 - North and East
 - East and South
 - South and West
 - West and North

Now, try measuring your angle.

Did you end up in the quadrant (section) you should be in?
